EVACUATION SOLUTIONS

RAISING AWARENESS – IMPROVING STANDARDS

www.globexchairs.co.nz

There is a common mis-belief that it is the responsibility of the emergency services to ensure everyone evacuates from a building safely. This is not true!

New Zealand Law, requires building owners, employers, and service providers to ensure the safe evacuation of mobility impaired persons in the event of an emergency. Such a plan must not rely upon the intervention of the Fire and Rescue Service (FENZ) to make it work. With no standards or industry recognised guidance as there is for other fire and safety equipment, the evacuation of mobility impaired persons from buildings is all too often left to chance, lives are put at risk and responsible persons such as building owners, employees are exposed to non-compliance.

Where access may be provided into a building, it does not mean suitable and sufficient provisions are in place for evacuating mobility impaired persons !

Our aim is to raise awareness and improve standards providing professional advice, quality products and a complete support service to assist clients to meet statutory obligations and provide peace of mind.

With over 50 years' experience within the fire safety and evacuation sector we provide solutions for ensuring the safe evacuation of mobility impaired people from the upper or lower levels of buildings in the event of an emergency or when lifts can not be used due to maintenance or a power failure.

- Maximum capacity 95kg

Simply owning evacuation equipment does not mean compliance, it is essential there are suitable and sufficient procedures in place, trained operators and equipment is maintained.

To ensure compliance with the fire service FENZ Regulations 2018 (Fire Safety Regs) and other legislation, our certificated trainer and operator training courses provide attendees with the necessary knowledge and ability to operate evacuation equipment correctly.

We also provide speakers at seminars and events to raise awareness of the need for safe evacuation for all users of buildings.

To ensure compliance with New Zealand Health and Safety Act/Regulations and the FENZ Regulations 2018 , we also provide certificated maintenance checks of all types and makes of evacuation equipment.

Our compliance packages provide peace of mind that clients are meeting their statutory obligations at discounted fixed prices for 3-5 years, these packages also add additional years to our 5-year warranty on all our evacuation chairs.

Our competent experienced personnel can also train and maintain other brands of evacuation equipment.

Contact us today for all your evacuation requirements.
